February 2018 Professional Development Opportunity

Cobar Mobile Children's Service, Bogan Shire Children's Services and Contact Inc. are excited to advise that Dr Camilla Gordon is travelling to Cobar and Nyngan during the week of 26 February 2018.

Camilla is available to offer a hands on *Adventures in Science* professional development days for interested professionals in Cobar and Nyngan.

Dr Camilla Gordon is a veteran educator and a passionate advocate for science education, particularly in the early childhood years. Camilla's research places children as very capable and ready for learning, honouring the wonderful intelligence and imagination of the young child. Camilla's *Adventures with Science* professional development will focus on science, is all around us and is for everyone, regardless of age, and if we teach children early, they grow up with a love and understanding of biology and chemistry; geology and meteorology; physics and astronomy.

So knowing where the earth came from and that we are all made from the stuff of stars is basic science for us all. Discovering the science in our world is a creative and fun-filled adventure, able to be taught to the youngest child and the oldest adult.

Draft dates to be confirmed are:

Cobar	Tuesday, 27 February 2018
Nyngan	Thursday, 1 March 2018
